

HOW TO : JACOPO

ROTOR DC

1- Choose the perfect spot on your wall where you'd like to mount your light

2- Feed the wall cable through the mounting bracket, then secure the bracket firmly to the wall

3- Connect the wires using the provided connectors

4- Feed the cable through the ceiling cap

5- Attach the ceiling cap to the bracket using the two screws

6- Hold the glass shade around the ceiling cap and screw the brass plate onto the threaded rod to secure it

7- Place the brass disc onto the threaded rod

8- Add the washers around the threaded rod if the brass disc is loose after the step 9

9- Attach the socket base to the threaded rod and tighten the small built-in screw

10- Connect the socket cables

11- Screw on the upper part of the socket

12- Insert the bulb, switch on and enjoy your new light
